

My first document

This is a short example of a \LaTeX document I wrote on November 12, 2014. It shows a few simple features of automated typesetting, including

- setting the default font size to 12pt;
- specifying article type for formatting;
- using the Palatino typeface;
- adding special formatting for URIs;
- formatting a heading in section style;
- using the \LaTeX logo;
- generating today's date;
- formatting a list of items;
- centering and italicizing;
- autonumbering the pages.

More information

This example was taken from Formatting Information, which you can download from <http://www.ctan.org/tex-archive/info/beginlatex/> and use as a teach-yourself guide.

Have a nice day!
